

Game Development Document

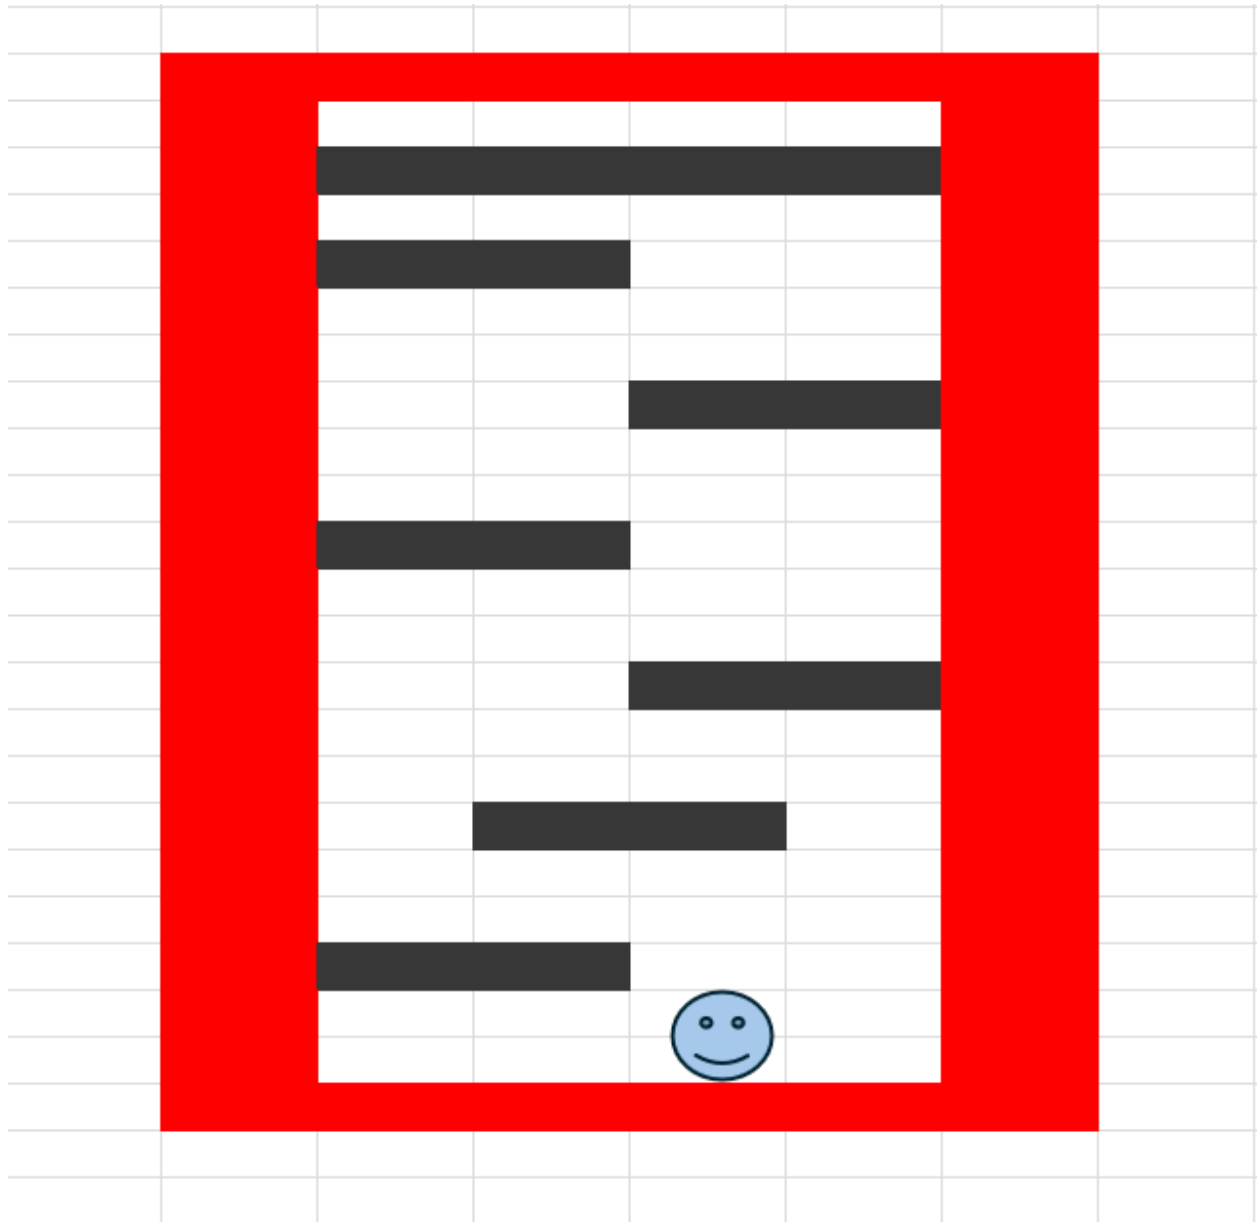

1. Story & Gameplay

Story (Brief)

- I was inspired by the early 2000s arcade type/computer game “ICY TOWER”
- The goal of this game is to move a character and jump up levels until you reach the top of the tower

Example Image / Mind Map:

I created this example of what I wanted to make in Excel

Story (Detailed)

- I have named my version of the game: “Ghostly Tower”
- I have used a spooky theme with creating a gradient background
- Changing the ball into a glowy ghostly like figure
- Changed the paddle created for breakout into multiple stationary paddles that are used as levels for our ball/ghost character to jump on

Example Image:

Gameplay (Brief)

- `GenerateTowerPlatforms()`
- `DrawGhost()`
- `GameLoop.Start()`
- The Gameplay is very similar to the Breakout Game where we define the tower's platforms, we draw our ghost and we code movements to go along with arrows

Gameplay (Detailed)

- `Select Case e.Key`
- `Case Key.Left`
- `MOVE_LEFT = True`
- `Case Key.Right`
- `MOVE_RIGHT = True`

MOHAMED FIRAS ARFAOUI - Game Name: <GHOSTLY TOWER>

- Case Key.Up
- WANT_JUMP = True
- Case Key.Escape
- Me.Close()
- End Select

Ghostly Tower GAME FLOW CHART

2. Assets Needed

Visual Assets

2D / 3D Textures

- Environment Textures
- Game Element Textures

Characters

MOHAMED FIRAS ARFAOUI - Game Name: <GHOSTLY TOWER>

- I would like to ball/ghost to be more a simple character that jumps, maybe something similar to Mario's king boo

Environmental Art

- I would like the tower to be more customized, have the levels be gooey/gory looking
- Add more spooky elements and pop ups

Audio Assets

Ambient Sounds

- Something similar to the Phantom of the Opera but played on a syn that is set to celesta or fantasy (I was using my Yamaha keyboard to experiment on the vibes)

Player Sounds

- I would like to add in some spooky sounds
 - And maybe change the music to something dramatic for game over
-

3. Code / Scripting

Player Scripts

- Player controls game by using keys

Environment / Ambient Scripts

- Maybe creat level/theme changes after a certain amount of paddles have been surpassed
-

4. Animation

Environment Animations

- Moving platforms would be a cool add on
-

5. Issues in Personalization that still need troubleshooting

Ending the game

- Figuring out how to end game when character falls, adding pop up text and ending the game

Limiting the game to a certain amount of levels
